Greetings;

My submission is simple.

The Climate change Authority is behove to the Paris Accord, a UN/IPCC instrument specifically designed to impose draconian socialist impost on western industrialised nations.

Despite protestations, there is no emperical proof that CO2 is responsible for the ever changing climate.

The UNIPCC has clearly stated that "Catastrophic Anthropogenic Global Warming" (now rebadged as "climate change", again rebadged as "climate emergency") has nothing to do with the environment but that it's agenda is "system change".

System change is merely a polittally neutral statement that implies a change from capitalism to socialism.

Australia ought not to be a signaturee to this nefarious agenda.

Wind and Solar do not provide stable or economic energy to run business.

If "renewables" were competitive they would be embraced for profit, and not need scandelous taxpayer subsidies.

My submission is simple; disband the Climate Change Authority and tear up the Paris Accord.

Regards;

Peter Van de Graaff
